Business

Boston University

2020 - 2024

Boston, MA

SKILLS

Software/Tools

SQL

Excel/ Google Sheets

Tableau

Google Analytics

Soft Skills

Edge-case interrogation

Change-impact thinking

Calm escalation

WORK EXPERIENCE

Business Analyst

Lancer Insurance Company

2025 - current / Boston, MA

- Re-architected claims intake to remove two approval bottlenecks, **dropping first-contact time from 3.8 days to 1.4 days** while keeping compliance checks intact.
- Built an executive-ready triage view in Tableau that surfaced reopen drivers and pushed escalations down from 12 to 4 per rollout.
- Drove a release cutover plan that reduced post-launch “urgent fixes” from 9 to 3 by locking entry criteria and exception handling upfront.

Junior Business Analyst

ThreeBridge Solutions

2024 - 2025 / Boston, MA

- Turned workshop notes into a dependency-aware backlog of 23 items, so Sprint 1 started clean without mid-sprint re-scoping.
- Mapped current vs future onboarding flows (including edge-case paths), cutting clarification loops from 8 emails to 3 per change request.
- Validated requirements using SQL spot-checks against source data, **preventing 7 logic defects** from reaching UAT.

Business Analyst Intern

Geico

2022 - 2023 / Boston, MA

- Isolated the top 3 repeat-contact drivers by analyzing journey patterns in Google Analytics, contributing to a **9.7% repeat-rate drop** over 6 weeks.
- Documented two end-to-end process briefs (happy path + exceptions) that became 11 implementable tickets with clear “definition of done.”
- Cleaned weekly reporting in Excel/Google Sheets by standardizing filters and date logic, shrinking discrepancies from 14 issues to 4 before review.
- Drafted a weekly one-page insights brief that paired each trend with a next-step test, helping the team prioritize fixes without guesswork.
